

**PINE BLUFF / WHITE HALL URBAN AREA TRANSPORTATION
PLANNING SURVEY**

The purpose of this survey is to gather input on transportation issues and selected transportation projects within in the Pine Bluff/White Hall urban area. This information will be used as a guide in the developing the Year 2040 Transportation Plan for the Pine Bluff/White Hall urban area. In accordance with federal regulations the plan is required to address multiple modes of transportation including vehicles, bicycles, pedestrian, transit, and intermodal. Your input will assist the Southeast Arkansas Regional Planning Commission and the Metropolitan Planning Organization in preparing the Year 2040 Long Range Transportation Plan for the Pine Bluff / White Hall urban Area.

Transportation Issues:

Please rank in order the top five transportation issues that you feel needs to be addressed in the Year 2040 Transportation Plan, with 1 being the top priority issue to be addressed and 5 being the lowest priority.

Widen major streets that provide north-south and east-west traffic movement.	<input type="checkbox"/>
Widen major streets at select locations for the purpose of stimulating industrial development.	<input type="checkbox"/>
Upgrade existing transit service and facilities that would decrease the maximum trip time from trip origin and destination to 30 minutes or less.	<input type="checkbox"/>
Implement a pedestrian capital improvement program that would include construction of sidewalks and trails that would provide access to entire urban area.	<input type="checkbox"/>
Implement a bikeway system that would consist of constructing bike trails along existing streets that would provide access to the entire community.	<input type="checkbox"/>
Implement a safety program and capital improvement safety program that would address an array of safety issues such as establishing a bicycle safety program, implementing an aggressive road safety enforcement program, improving traffic signalization, and eliminating street jogs,	<input type="checkbox"/>
Widen and make improvements to neighborhood streets so as to bring the streets in to compliance with City Street Standards	<input type="checkbox"/>
Implement a pedestrian capital improvement that would consist of repairing existing sidewalks, construct new sidewalks along the streets and constructing pedestrian trails throughout the community that would connect the various neighborhoods with places such as schools, places of employment and commercial areas.	<input type="checkbox"/>

Street projects in your neighborhood:

Please list the top three transportation projects in your neighborhood that needs implemented such as street maintenance, intersection improvement, and minor street widening.

1. _____
2. _____
3. _____
